VIDAYA

YOUR HEALTH, DECODED

PARTNER KIT · OCTOBER 2026

Everything you need to tell your audience about Vidaya

Who it is for, what it costs, how you earn $50 per member, ready-to-post creatives and captions, logos and screenshots, and the few rules that keep everyone out of trouble. Works whether or not you are set up on Impact.com yet.

Vidaya web dashboard: healthspan score, longevity pillars, trends and daily insights from the member's own data.

Questions: support@vidaya.ai

VIDAYA

One place that makes sense of all your health data

Wearables, blood work, DNA, body composition, medications and supplements, read together by Vaya Chat.

The one-liner

Vidaya connects your wearable data, blood work and DNA into one dashboard, and lets you ask your own numbers anything with Vaya Chat. Your health, decoded. $10 per month, or $89 per year.

What members get

Wearables: Apple Health, Oura, Whoop, Garmin, Fitbit, Google Fit, Polar, Withings, Dexcom and Levels, up to five at once, with up to a year of history backfilled on connect.

Blood work: upload any lab PDF; every biomarker is extracted, explained in plain language, scored against longevity-focused optimal zones and tracked over time. Doctor-ready summary PDFs.

DNA: upload a raw 23andMe or Ancestry file for categorized, consent-gated genetic insights.

Vaya Chat: answers grounded in the member's actual measurements, not generic advice. **VAI Score:** the day's health in one number. **Social Hub:** leaderboards and private Squads across device brands.

Who is buying (our paying members, Oct 2026)

Age: 8 in 10 paying members are 45 or older; the median member is in their mid-50s. A 45+ sign-up becomes a paying member about seven times as often as one under 35.

Gender: about three in four are men today; women are the fastest-growing group, and women-led channels are where we most want partners.

What they have in common: 9 in 10 already wear a device (Apple Watch, Oura, Garmin, Whoop) and never look past the watch app; half have recent blood work they did not fully understand.

Why they pay: one place for everything, plain-language lab explanations, and being able to ask questions about their own numbers.

Best-fit audiences: health-curious adults 45 to 70, wearable owners, people managing a marker (cholesterol, glucose, blood pressure, thyroid), longevity and healthy-aging communities.

VIDAYA

What your audience pays, and what they get with your link

$89 per year

or $10 per month

One plan. Every feature included, no tiers, no add-ons. Yearly works out to about $7.42 a month. There is no free tier, so never say or imply "free".

$10 off

with your partner link

Your audience saves $10 on their first purchase when they come through your link ($79 for the year instead of $89). The link applies it; there is no code to type.

30 days

money-back guarantee

If Vidaya is not for them, they email support@vidaya.ai within 30 days of the first purchase for a full refund. Cancel anytime, self-serve.

Where it works

United States, Canada, United Kingdom and Australia. Web app on any browser, iOS app on the App Store; Android users use the full web app today.

Approved pricing phrasing

"$10 per month, or $89 per year" · "$89 a year if you go annual" · "Monthly is $10. Annual is $89." Never frame $89 as a discount off a higher number, and keep the $10 off tied to your link.

What to tell them to do

1. Tap your link and create an account (about a minute).
2. Connect a wearable and upload a lab PDF or DNA file.
3. Subscribe when the dashboard asks; your $10 off is already applied.

Only real paid subscriptions count toward your commission.

VIDAYA

$50 for every member you bring, yearly or monthly

Paid through Impact.com. Not on Impact yet? Email support@vidaya.ai and we send a direct invite.

1 Apply to the Vidaya program on Impact.com

A free partner account, a few minutes. Link: app.impact.com, search Vidaya, or ask us for a direct invite. Once approved your personal tracking link is under Ads & Links.

2 Use your link everywhere

Every post, story, bio slot, newsletter and video description. The link is what tracks your commission; a mention or a code on its own does not.

3 Your audience joins and subscribes

They get $10 off through your link. Yearly or monthly, both count.

4 You earn $50 per member

Yearly commissions confirm 31 days after purchase (past the 30-day guarantee). Monthly commissions confirm when the second month is paid. Impact pays you directly; add bank and tax details in your Impact account.

Both cards are in the kit under creator-cards/ if you want to show your audience how the program works.

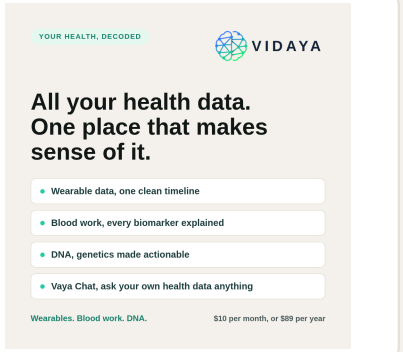

Members referring friends is a different program

Every Vidaya account has its own referral link under Profile, Refer Friends, with its own reward tracked inside Vidaya. Pick one route and stick to it; mixing them splits your stats.

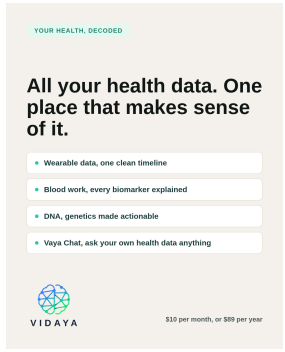

READY TO POST

Ten creatives, sized for every placement

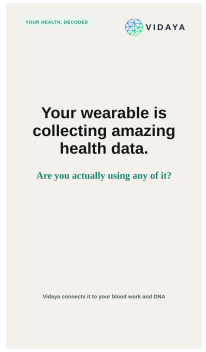

All files are in the kit under creatives/. Cream cards follow the Vidaya brand guide; founder-photo ads carry the price and guarantee on the image.

VIDAYA

Copy you can paste, or say in your own words

Swap in your own experience wherever you can; genuine beats polished. Replace [YOUR LINK] with your Impact link.

Core value

All your health data. One place that makes sense of it. Vidaya connects your wearable, blood work and DNA into one dashboard, and Vaya Chat lets you ask your own numbers anything. $10 per month, or $89 per year, and $10 off through my link: [YOUR LINK]

Wearable angle

Your watch is collecting amazing health data. Are you actually using any of it? Vidaya turns it into things you will act on, and connects it to your blood work and DNA. Monthly is $10. Annual is $89. $10 off here: [YOUR LINK]

Blood work angle

Stop guessing what your lab results mean. Upload your blood work to Vidaya and every marker is explained in plain language, tracked over time, and read alongside your wearable and DNA. $10 off with my link: [YOUR LINK]

DNA angle

Your DNA file is more useful than you think. Upload the raw file from 23andMe or Ancestry and Vidaya turns it into categorized insights you actually use, next to your labs and wearable data. [YOUR LINK]

Guarantee angle

Try Vidaya for 30 days. If it is not for you, email them within 30 days for a full refund, no forms, no questions. $10 per month, or $89 per year. [YOUR LINK]

30-second video script

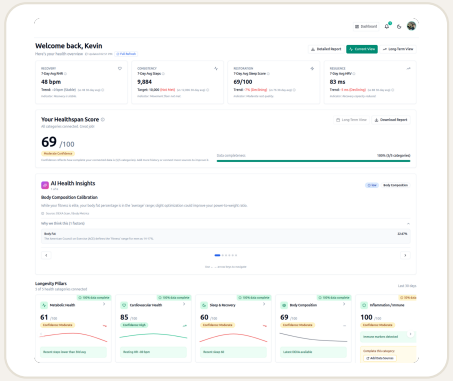

Hook: "I wear this watch every day and I never looked at the data." Problem: labs in a portal, DNA in a PDF, sleep in an app, nobody connecting them. Turn: "Vidaya pulls all of it into one dashboard and I can ask it questions about my numbers." Show the dashboard or Vaya Chat on screen. Close: "$89 a year, $10 off with my link, and a 30-day money-back guarantee."

Newsletter snippet. Subject: The health dashboard your wearable has been missing. Body: I have been using Vidaya. It pulls my wearable data, blood work and DNA into one dashboard and lets me ask questions about my own numbers with Vaya Chat. Monthly is $10. Annual is $89, $10 off through my link. If you own a wearable and never look past the watch app, this is the missing piece. [YOUR LINK]

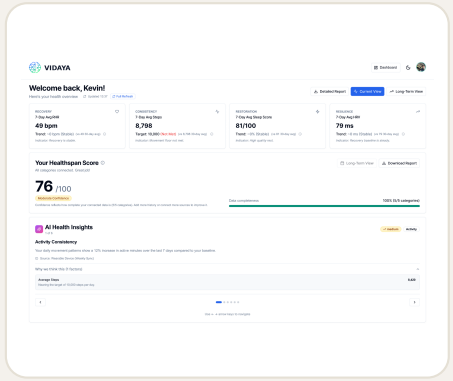

VIDAYA

Screenshots and logos you can use as-is

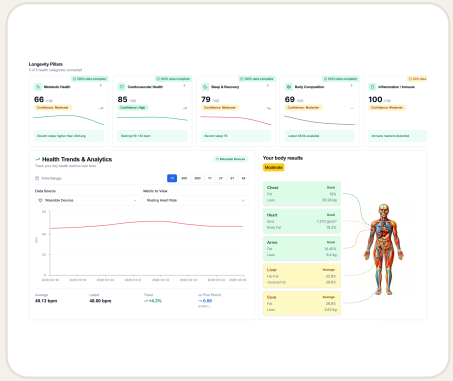

Under screenshots/ and logos/ in the kit. Screenshots are from demo accounts; do not screenshot a real member's data.

Brand rules in one breath

Brand: **Vidaya**, never "Vidaya AI". Assistant: **Vaya Chat**. Tagline: Your health, decoded. Logo on cream, white or dark teal only; no recoloring, stretching or effects. vidaya-logo.svg included for print and video.

VIDAYA

Say this, not that

Vidaya organizes, explains and tracks health data. It is not a doctor, and your audience should hear it that way.

Do say

"Vidaya organizes and explains your health data": organization, interpretation and tracking.

The real pricing: $89 a year or $10 a month, $10 off with your link. Never "free".

"Vaya Chat" for the assistant; "VAI Score" for the daily number.

"HIPAA-compliant safeguards": Vidaya protects health data with encryption and never sells it; members can delete everything at any time.

Your own genuine experience with your own data. Honest beats polished.

Don't

Don't claim Vidaya diagnoses, treats, cures or prevents any disease, or guarantees a health outcome.

Don't invent statistics, user counts or clinical claims. If you want a number, ask us.

Don't promise features that are not live. Live today: wearables, blood work, DNA, body composition, Vaya Chat, VAI Score, Social Hub.

Don't run paid ads on Vidaya brand terms, or use the old VIDAYA20 code, without written approval.

Don't post screenshots of a real person's health data without their written OK.

Questions, a direct Impact invite, a custom creative, or a member of your audience who needs help: support@vidaya.ai. We answer within one business day. Partner program details and the demo video are always current at vidaya.ai/affiliates.
Disclosure: in the US the FTC requires you to tell your audience you earn a commission. "#ad" or "I earn a commission if you join through my link" is enough.
